

TAVONEL

Measured access. Bounded compute. Contracted enterprise scope.

STANDARD ACCESS

Plan	Price	Included scope
Observer	\$29 / month	Individual read and review access
Studio	\$99 / month	Individual production workspace access
Institution	\$499-\$4,999 / month	Multi-user governance, support and deployment scope agreed by contract

PREPAID COMPUTE

Pack	Price	Credits
Starter	\$12 one time	100
Builder	\$30 one time	300
Scale	\$75 one time	800

Access plans do not include unlimited GPU processing. Compute is prepaid, reserved before dispatch, and subject to job and workspace limits.

CUSTOM SERVICES

Service	Guideline range
Security and deployment onboarding	\$1,500-\$10,000 one time
Source connector or workflow implementation	\$2,500-\$25,000 one time
Dedicated support or governance package	\$500-\$5,000 / month

These are non-binding planning guidelines. A final quote depends on users, source volume, retention, support hours, security review, data residency, integration complexity, and qualified compute demand. No custom work starts until both parties accept a written scope and price.
